

Description Of KSM 06

Concealed Elements

The elegant kettle is made up of plastic which works as a thermostat and also looks classy in your kitchen. Kettle is available in red color which adds to the aesthetics of your kitchen.

Automatic Stop

The kettle has an auto stop option which makes it a safe appliance for your kitchen. Now, you don't need to clean your kitchen with spilled tea. This stylish kettle will automatically stop the appliance when the temperature starts to rise. This will not only keep your kitchen slab clean but will also save power.

Wide Mouth – Easy to Clean

It has a broad, circular mouth which aids in easy washing. You can wash this sophisticated kettle easily with water.

Swivel Power Base

The affordable kettle has a swivel base feature which warms the liquid while moving in circular motion. This advanced feature makes it attractive and keeps your coffee hot for a very long time.

Other Important Features

The easy to use kettle is cordless which cuts down the problem of messy wires in your kitchen. The kettle has a detachable jug facility which makes it convenient to clean. The light weight kettle prevents any chance of accidents.
