

Description Of KSM 13

Safety with Style

Any appliance which is used for boiling liquid needs to be designed accordingly so that its electrical circuits stay protected. The steel kettle with glass lid has concealed elements which not only protect the user, but also the kettle from damage.

Automatic Stop

This leak-proof kettle does not need to be monitored constantly as it works. It has an auto-stop feature which shuts it down when the water has boiled. This prevents it from boiling dry, and ensures a long life for the appliance.

Easy to Clean

This sturdy kettle is shaped like uniform cylinder, and has a wide mouth which makes it easy to clean. Hence, it is left fresh-smelling and odour-free even if you have been boiling milk in it.

Aluminium Body with see through cap

Made of high-quality food grade aluminium, this kettle with glass lid has a durable body. The transparent glass lid not only makes it look stylish, but also enables you to keep an eye on the water or milk you are boiling to make sure it is done just right!

Single Touch Lid Locking

The lid of the Prestige steel kettle with glass lid closes with a single touch. It locks into place easily to eliminate chances of accidental spillage.

Sturdy Handle

The sturdy handle of this electric kettle is designed to allow a firm grip while you work. Use it without any risk of it slipping or falling.

360 Degree Swivel Base

This kettle has a modern design which includes features designed to give you ease of use. A 360-degree swivel ensures that you can pick it up from any side. Just plug it in and place it on your kitchen counter or office pantry so that everyone can pour themselves a steaming cup or water for their tea or coffee.

Other Important Features

Light, portable and convenient, steel kettle with glass lid is a versatile appliance which can be put to various uses. Whether you are buying one for yourself, or as a gift, you are sure to be satisfied with it!
