

Description of WGSM 02

Stainless Steel jar with Polycarbonate Lid

This Wet Grinder comes is equipped with a stainless steel jar which is highly durable and has a massive capacity of 2 litres. This jar has rust and corrosion resistant properties that allow it to last long, as good as new. This jar also comes with polycarbonate lid which is very tough. This transparent lid allows users to have a quick peek inside the jar. Hence, you can watch the appliance in action and monitor the progress.

Anti-Skid Feet

The anti-skid feet of this appliance provides added stability and make it easy to operate. This is a much needed safety measure.

Rust Proof Plastic Body

Courtesy of the strong rust-proof body, this wet grinder has a long-life. The rust proof feature and shock resistant feature of this appliance makes it completely safe to handle and use.

Other Important Features

The wet grinder delivers consistent performance courtesy of its powerful heavy duty motor. This motor works with 200 watts. The durable grinding stone is also very effective and it comes in a unique design that enhances its performance. It has a larger contact area, which leads to a quick turnaround time. It is also equipped with coconut scraping attachment that helps in scraping coconuts effectively. This appliance also caters to your atta kneading demands thanks to its kneader attachment. It also has the auto-off facility that prevents accidental damage.
